

Acoustic Research Now Delivering Extended Line of Portable Wireless Speakers

Line expands with new features and designs

HAUPPAUGE, NY – June 14, 2012 – Acoustic Research (AR) today announce they are now shipping their award-winning wireless speaker line to national, regional and select online retailers.

The 2012 lineup features models with multiple connectivity options, including Bluetooth® wireless, direct connect through a 3.5mm Aux input and 900MHz wireless with 150-foot range. The new Acoustic Research Portable Wireless Speaker collection offers a variety of Mission-, Main Street-, and Sport-styled wireless speakers designed for the “new living room” – outdoor living spaces with upscale landscaping, patios, decks, courtyards and gazebos.

“Nobody wants their audio systems trapped in one room when life happens all over the house, both indoors and out. The Acoustic Research line of Portable Wireless Speakers fits the bill, allowing consumers to take their favorite audio wherever they want,” said David Geise, President of Audiovox Accessories Corporation. “There are six new portable indoor/outdoor models in our mission and main street speaker design styles, as well as a rugged ultra-portable wireless sports speaker model, which won a CES Innovation Award this year.”

Geise further stated, “Our wireless speaker line leads the category, providing the latest in connectivity as well as quality sound. With the popularity of Smartphones and Tablets, and increasing sales of all portable devices such as iPods and other MP3 players, it’s clear that consumers are becoming more and more desirous of enjoying their audio files and playlists wherever they go, and not just on headphones. Our extended line of wireless speakers gives these consumers complete freedom to listen and share virtually anywhere, with multiple connection options, including Bluetooth wireless, which is compatible with a wide range of portable devices, like iPhones, iPod touches and iPads, as well as Android devices and beyond. We have covered all the technology bases.”

AWS5 (Mission Style) and AWS6 (Main Street Style) Portable Wireless Speakers:

The AWS5 and AWS6 offer 150-feet of room to roam from the wireless transmitter, with high quality, full, rich sound that lets you listen to music from your MP3 player, AV receiver, Smartphone, Tablet, or other audio device wirelessly. Best of all, they are expandable, so you can add multiple units to enhance your outdoor environment. They are simple to set up, with push-button auto-lock tuning, and produce great sound in a compact form, with two-way acoustic design and bass boost. Each model runs on AC adapter (included) or six AA batteries (not included) and includes speaker, transmitter, two AC power adapters, and a mini-jack to stereo lead adapter. The AWS5 (Mission Style) and AWS6 (Main Street Style) have a suggested retail price of \$99.99.

AWS53 (Mission Style) and AWS63 (Main Street Style) Portable Wireless Speakers:

The AWS53 and AWS63 let you enjoy your music anywhere at home or on the go. Both models offer two ways to connect to your music. The 900MHz wireless transmitter gives you 150-feet of room to roam from your audio source, great for outdoor entertaining at home, with crystal clear high quality wireless audio. The speaker's 3.5mm jack offers a convenient connection option to use anywhere you go—just connect your MP3 player or Smartphone to the speaker and enjoy! AR Wireless Speakers are simple to set up, with push-button auto-lock tuning, and produce high quality sound in a compact form, with two-way acoustic design and bass boost. Each model runs on AC adapter (included) or six AA batteries (not

included) and includes speaker, transmitter, two AC power adapters, a mini-jack to stereo lead adapter, and a mini-jack direct connect cable. The AWS53 (Mission Style) and AWS63 (Main Street Style) have a suggested retail price of \$119.99.

AWS5B3 (Mission Style) and AWS6B3 (Main Street Style) Portable Wireless Speakers:

The AWS5B3 and AWS6B3 represent the ultimate in portable sound for music that goes wherever you go. Bluetooth wireless lets you stream and control your music from any Bluetooth-enabled wireless product, great for anywhere you are. The 900MHz wireless transmitter gives you 150-feet of room to roam from your audio source, great for outdoor entertaining at home, with crystal clear high quality wireless audio. And the speaker's 3.5mm jack offers a convenient connection option to use everywhere in between—just connect your MP3 player or Smartphone to the speaker and enjoy! AR Wireless Speakers are simple to set up, with push-button auto-lock tuning, and produce high quality sound in a compact form, with two-way acoustic design and bass boost.

Each model runs on AC adapter (included) or six AA batteries (not included) and includes speaker, transmitter, two AC power adapters, a mini-jack to stereo lead adapter, and a mini-jack direct connect cable. The AWS5B3 (Mission Style) and AWS6B3 (Main Street Style) have a suggested retail price of \$159.99.

AWSBT1 Portable Bluetooth Wireless Speaker (CES Innovation Award Winner):

Portable MP3 devices have made it easy to take our music wherever we go. But unhooking from the earphones and sharing our music with others has not been so easy – until now. The AR Outdoor Portable Wireless Speaker (AWSBT1) lets you share your music wirelessly via Bluetooth (or wired, using the built-in 3.5mm cable). It's compact, easy-to-carry and simple to use, with a UV- and water-resistant exterior that lets you take it to the beach, tailgating, the basketball court, even on a camping trip, with no worries. The speaker offers a protected storage space for your keys or other personal effects,

even for your MP3 player or Smartphone while it's connected to the speaker. The AR Portable Bluetooth Wireless Speaker is a must-have addition to any get-together on the go. The AWSBT1 has a suggested retail price of \$129.99.
